

ForecastIQ | Enterprise Revenue Intelligence

From Marketing Spend to Absolute Revenue Certainty — 30, 60, and 90-Day Outlook

Audit Date: 2026-07-01	Platform Mode: 100% Offline AI Utility
Data Quality Score: 98.2/100	Enterprise Risk Classification: High Risk

1. Executive AI Analyst Summary

Executive Key Takeaway: Over the full historical timeline, ForecastIQ has audited \$2.18M in digital marketing spend yielding \$11.10M in revenue (Portfolio ROAS: 5.09x). Our 90-day probabilistic ensemble projects sustained top-line stability with a P50 expected capture of \$0.26M. Search campaigns continue to function as your high-efficiency anchor, while social prospecting provides scalable incremental demand.

2. Multi-Horizon Revenue & ROAS Projections

The following forecasts are derived from our multi-model weighted ensemble (Prophet, XGBoost, LightGBM, CatBoost). P10 represents your conservative 90% confidence cash flow floor, P50 is your expected baseline, and P90 models aggressive market capture.

Planning Window	Business Metric	P10 (Worst Case)	P50 (Expected Case)	P90 (Best Case)
30 Days	Revenue	\$3,751	\$75,027	\$149,161
30 Days	ROAS	0.13x	2.53x	5.03x
60 Days	Revenue	\$39,122	\$163,800	\$288,478
60 Days	ROAS	0.60x	2.53x	4.46x
90 Days	Revenue	\$91,350	\$260,339	\$429,329
90 Days	ROAS	0.93x	2.65x	4.36x

3. Channel Performance & Contribution Breakdown

Treating existing channel attribution as the overarching source of truth, here is the forward 60-day expected contribution and efficiency analysis across your primary paid acquisition channels.

Acquisition Channel	Modeled Metric	Conservative (P10)	Expected Baseline (P50)	Aggressive Scale (P90)
Bing Ads	Revenue	\$430	\$8,592	\$21,000
Bing Ads	ROAS	0.08x	1.70x	4.15x
Google Ads	Revenue	\$11,888	\$237,766	\$482,001
Google Ads	ROAS	0.21x	4.26x	8.63x
Meta Ads	Revenue	\$1,990	\$39,805	\$148,921
Meta Ads	ROAS	0.22x	4.40x	16.47x

4. Optuna Enterprise Budget Optimizer

Using Optuna automated hyperparameter & budget search, we optimized a global monthly budget of **\$100,000** to maximize total revenue subject to a Target ROAS floor of **4.5x**. Diminishing returns parameters were calibrated from historical efficiency.

Marketing Platform	Recommended Spend	Expected Revenue Capture	Modeled Platform ROAS	Target Spend Share
Google Ads	\$40,603	\$207,412	5.11x	40.6%
Meta Ads	\$40,674	\$263,356	6.47x	40.7%
Bing Ads	\$18,637	\$46,823	2.51x	18.7%
GLOBAL OPTIMIZED TOTAL	\$99,914	\$517,591	5.18x	100.0%

5. Enterprise Risk Intelligence & Growth Action Plan

The overarching portfolio Risk Classification is evaluated as **High Risk** (Enterprise Risk Score: 70.5/100). Below are the specific operational risks identified by our offline causal intelligence layer and recommended mitigation actions.

Evaluated Risk Vector	Risk Sub-Score	Status	Strategic Mitigation Action Plan
Revenue Volatility	100.0/100	Monitor	Utilize automated pacing tools to smooth out mid-week revenue depressions and maintain consistent top-of-funnel impression share.
Channel Dependency	58.5/100	Concentrated	Google Ads represents over 50% of revenue capture. Begin scaling top-of-funnel Meta prospecting to establish a strong secondary growth pillar.
ROAS Instability	85.4/100	Volatile	Enforce rigorous Target CPA / Target ROAS bid floor rules across all Meta generic and non-brand campaigns to prevent runaway spend.
Data Quality Audit	1.8/100	Excellent	Validation engine verified a 98.2/100 schema score. Ensure Bing campaign UTM tracking tags are consistently appended.
